ABOUT ME

I am a passionate front-end developer focused on user interface and user experience, delivering innovative and efficient solutions for web development projects. I have a solid foundation in HTML, CSS, JavaScript, and frameworks such as Vue.js and React

During my internship, I gained valuable experience, including working in teams to develop projects, collaborating with back-end, mobile, QA, BA, and design teams, learning to troubleshoot and resolve issues effectively, and deepening my understanding of various technologies

You can explore more in my portfolio and the applications I have developed :

WORK EXPERIENCE

Frontend Developer

Madison Technologies company   Aug 2024 - Dec 2024

- Participated in the development of the MOVE project, building the front-end functionalities of the application
- Implemented interfaces based on UI/UX designer files on Figma using VueJS, Tailwind CSS, and Shadcn UI
- Gained experience in handling user authentication, social media authentication, payment processing, and web security using services like JWT, Firebase, and Stripe
- Collaborated with the BA team to analyze project requirements, propose solutions, divide tasks, and estimate completion times
- Worked closely with other teams, such as backend, mobile, and design, to address challenges and ensure the best and fastest project development
- Operated within an Agile Scrum workflow, participating in daily stand-ups, sprint planning, and retrospectives
- Experienced in working with GitHub, resolving source code issues, and deploying projects to production environments
- Demonstrated a strong willingness to learn, proactive thinking, and actively raised issues to ensure the team stays aligned

MOVE Project

MOVE is a video streaming platform focused on sports-related content, featuring instructional videos for at-home exercises such as Yoga, Gym, and more. The application is available on both web and mobile platforms

Team Size: 16 members

Role: Frontend Developer

Key Responsibilities:

Developed functionalities for user authentication, real-time notifications, video uploads with Vimeo, and video information management

Actively participated in daily stand-ups, sprint planning, and retrospectives as part of the Agile Scrum development process
